

The Best Wheat and Mixed Farming Lands in Alberta

VOL. III NO. 8

CHINOOK, ALBERTA, JUNE 15, 1916

Subscription: \$1.00 per year, in advance. Single Copy, 5 cents

Chinook's Sports Day, June 16

Breezelets

But it will take more than moving the clock forward an hour to move some men out of bed that much earlier.

Some of the hardest work is done by men who try to make a living without hard work.

Anyone around complaining that the skies were drying up and we would have to do without an adequate water supply in the future.

Do you realize that we are fast approaching the day when the length of daylight will begin to shorten? Don't lose the opportunity to worry about it.

"Great things from small beginnings grow," is a trite saying.

But remember, Chinookers, they never do unless the small things are started.

The "Shakespeare cocktail" is latest alcoholic novelty. In sufficient quantity it is guaranteed to bring about much ado about nothing and a comedy of errors.

One notion of the very summit of human efficiency is managing to dress in the upper berth of a Pullman.

The Kaiser gives some praise to the almighty for the sinking of a few British ships in the recent naval battle.

Not since the sinking of the Louisiana has the Kaiser given thanks to the almighty.

And scant notice the almighty is getting from the Kaiser for the non success of the German arms before Verdun for the last four or five months.

Next Wednesday, June 21st, is the longest day of the year.

Good night! Where are the "long nights" gone to this year?

Hollweg says Germany is tired of offering peace.

Not half so tired as the Allies because of Germany's peace tommy-rot.

R. M. of Golden Centre, No. 272

The 6th meeting of the above council was held at L. C. Michael's Wednesday, June 7th.

Members all present, except Councillor Wilson.

Minutes read and confirmed.

Communications read and disposed of.

Following accounts ordered paid:

Chinook Advance, printing 28 00
Oyen News, print. & advt 99 50
West'n Muni. News 5 45

Freight on " 29 60
Secretary, stamps 25 00

Logan, to instruct Councillor Tait to inspect work on Sounding Creek and table account of John Detcheon till next meeting.

McConnell, to empower Reeve to sign in advance cheques in settlement for fresnos and freight McConnell, to purchase from Canada Ingot Iron Culvert Co.:

31 8 inch, 18 feet culverts 15 10 inch " " 2 12 inch " " 3 15 inch " "

Morrow, to empower each councillor to buy lumber necessary for culverts.

Tait, to appoint C. McMurray weed inspector for ward 1.

McConnell, to empower Reeve Gardiner to appoint weed inspector for ward 2.

Weed Inspectors Ennis and Donielson were appointed to attend Weed Convention at Claresholm June 27, 28, 29, the council to pay expenses of one delegate.

Tait, that all weed inspectors meet at 10 a.m. next meeting to hear report of delegates to weed convention.

Tait, that applications for exemptions from hail insurance be accepted and reported to hail insurance board.

Logan, to release seizure against J. Edwards, on grounds cattle belonged to his wife.

Logan, bailiffs to appoint appraisers of property seized for taxes.

Morrow, to instruct bailiffs to hold till next meeting all seizures of property that ratepayers claim belongs to other parties.

Tait, bailiffs to appoint appraisers by June 12, and follow with notice.

Logan, to pay cash for road work, except to ratepayers in arrears, then to apply on the same.

Logan, to expend \$300 extra both wards 1 and 2 in lieu of (Continued on page 8)

Chinook Breezes

Mr. W. Gilbert left on Tuesday morning for a trip to Ontario.

The copy for Chinook's great agricultural society's fair prize list was placed in the printer's hands this week.

The Rev. C. Eason returned from conference last week end, and will remain in Chinook for another year.

He'll Sure Get Yer

Has the census man paid you a visit yet? If not, he will get you yet.

Getting in Good Work

Jupiter Pluvius has reigned (rained) supreme around this district during the past few weeks.

Down to Real Business

The 175th O.S. Batt., in which there are a number of the boys around here, is now at Sarcee camp, Calgary.

Anxious Time for Kiddies

The departmental examinations will commence in the public school on Monday and continue until the following Monday.

Wants a Windmill

A ratepayer enquires whether the village council intends to put the north well out of commission as it requires the use of a horse to get any water at present.

Has Done "His Bit!" Have You?

In the wounded casualty list of those who took part in the great fight at Ypres the other day, we noticed the name of Thomas Clarkson, kin at Clemens.

Hope It May Be Beneficial

Mrs. A. George left Wednesday morning for Banff. Of late Mrs. George has suffered much from rheumatism, and it is hoped that her stay at Banff may bring permanent relief.

The Old "Hoss" Wins Out

The auto mail going south on Monday morning encountered such bad roads when a few miles out of town, that it was found impossible to proceed, and returned. Finally the old reliable "hoss" was put on the job.

A Great Convenience

Commencing last Sunday there will be a daily train service on this line from Calgary to Saskatoon and from Saskatoon to Calgary. The Sunday train which had previously been omitted, is now put on. There is no change in the time.

Good Word for Chinook

ITS FOR CHINOOKERS TO MAKE GOOD

A man of affairs in Calgary, who visited Chinook some three months ago, writes to business man here to urge him to get after our Board of Trade and wake it up to hustle for more enterprises in our town. He writes that with a couple more railroads we should have here shortly after the present war, and the farmer will have herds of cattle grazing on what land is not plowed, and fattening them for market on their extensive wheat crops, Chinook can be a trim little city of 5,000 people, one not to be beaten by any prairie town in Alberta. What say you to that, all you who are knockers and snoozers, from a stranger in this province's pushing metropolis? Wake up, and get a move on yourselves, ye Chinookers.

Village Council

The above council met on Friday evening, June 2nd. Present: Chairman Brownell and Councillors Milligan and Maxwell. Minutes read and adopted.

A delegation from the local lumber yards waited upon the council re prices for lumber for sidewalks, when the following figures were submitted: M. E. Bird (U.F.A. price) \$19.50 Crown Lumber Co. 4 & 8 ft 19.00 Empire Lumber Co. " 19.00 Maxwell—Brownell, that the tenders of the Crown Lumber Co. and the Empire Lumber Co. be accepted.

Milligan, that a vote of thanks be tendered M. E. Bird, representing the U.F.A. lumber yard, for quoting lower prices than the two local lumber yards, and compelling the latter two companies, to give better prices and terms to the village. Carried.

Milligan—Maxwell, that the regular meeting of the council be held the last Tuesday of each month for the balance of the year. Council adjourned.

He's coining money, Ford is. He's getting rich for fair! If he keeps on he'll be an Automobillionaire.

Unlimited funds to loan on mortgage. Griffiths, Ford, Wright & Miller, Law Office, Chinook; also next to postoffice, Youngstown, Alberta.

COLLHOLME KOLUM

KATCHY KOGITATIONS

And It Will Be a Hummer

Watch this great family journal for our picnic advt.

Lucky Jap

We are pleased to note that Jap has fully recovered from the German measles.

An Apt Pupil

The postmaster is busy breaking. It is noticeable that he has learned many pointers at the Tavishville institution.

Better Than Mollin's Food

What's the matter with kurnal (coloune)? The Peyton medicine must surely agree with him, as he is getting extra stout.

Suffering Humanity

Many are complaining that they are not receiving this great family journal regularly, as they look towards its coming each week. Postmasters, please don't neglect this journal.

Yes, Do a Good Turn

Roads are in a bad condition, especially the township line leading west from Chinook. Let us hope that Sounding Creek council will deal mercifully with their neighboring municipality.

May Have To Change Date

The Collholme U.F.A. and C. A.C. have arranged to hold their second annual picnic on July 14. [Bills have been out for more than two weeks for the Little Gem picnic on July 14.—Editor.]

A Cross Between a Pup and the—

Lord Lucas made a present to Mr. Leggett of a young pup, which is growing rather peculiar. His head is about ten inches long; species of an alligator, with horns projecting out between his eyes like a rhinoceros, and his body like armadillo. We all expect that Mr. Leggett will get a big price for this curiosity.

"What Is More Precious than Rubies?"

We understand Mr. Dunster has been called home, he having fallen heir to \$15,000.00. Mr. Dunster will be greatly missed in this district, as he was always cheerful and willing to help any benevolent object. Whether our king will confer any honor upon Mr. Dunster or not, we all feel confident that his lordship will gain one Ruby.

(Continued on page 8)

No Wound-ee Hors-ee

ACQUITTED

Two cases in which the charge was wounding horses, were disposed of at the supreme court at Calgary, last week. The first of these was against John Oszust of Oyen. After hearing the evidence and addresses by counsel, the jury retired for about ten minutes and returned a verdict of "not guilty."

A similar verdict was returned with respect to the charge laid against Armand Stagan, also of Oyen.

Grazing Leaseholders

MUST PAY MUNICIPAL TAXES

His lordship Mr. Justice Simons last week delivered judgment in an unusually interesting case. This was when he gave judgment for the plaintiff in Rural Municipality of Marquis vs Hardwick Bros. This was the action in which the plaintiff company sued the defendants for taxes on their tract of grazing land which is within the municipality, and the defendants set up the defence that they held the land under a grazing lease from the Dominion government, and under section 125 of the British North America act should be exempt from taxation.

The tax account against the lands was made up as follows:
General municipal tax \$360.00
School tax, 1914 159.60
Hail tax, 1914 160.80
Educational tax 1912, 1913 and 1914 75 52

His lordship, after quoting statutes and cases in support of his finding, gave judgment for the plaintiffs in the foregoing amount, with interest at 5 per cent., bringing up the total to \$920.09.

Owing to the fact that there are hundreds of thousands of acres of grazing land in Alberta, payment of taxes upon which is being protested, the judgment is one of far-reaching importance.

A political speaker warning the public against the imposition of heavier tariffs on imports said: "If you don't stop shearing the wool off the sheep that lays the golden egg, you'll pump it dry."

"Save daylight." And the way to do it is to use it.

SUNLIGHT SOAP

Sunlight Soap is made for the housewife's profit, for only thereby can the makers hope to profit. Sunlight Soap makes your work lighter, your clothes whiter, your home brighter. It is mild and pure and does not harm either hands or fabric.

Ideal Silver Cream

It will clean more silverware in less time than any other preparation and it is not an electroplating agent. It removes nothing from the silverware. Put up in eight-ounce bottles, packed three dozen in case.

At All Jewellers

Life in the Cellars of Rheims

Soldiers in the firing line have no monopoly of bravery in the hour of danger.

Mr. Frank Hedges Butler, a well known London merchant, tells of a visit to the famous cathedral city of Rheims when on one day the Germans threw into it eighty shells!

"It was at a little snook given at the Rheims Club," he says, "most of the men members present being the children who have been in Rheims throughout the 520 days of the siege. Some of them were hostages during the short German occupation of the city."

"It was an excellent lunch, and in the middle of it the steward came in and quietly informed us that the Germans were bombarding the city. We went on with the lunch quite quietly, and after coffee I got a goodly number of the few remaining members in the club."

"In the afternoon I got permission to take a photo of the schools and chapel in the champagne cellars. The children's desks had been removed from the schools on the surface, and there were maps and pictures on the chalk walls. The children sang a number of patriotic and marching songs."

"Afterwards I got a group of children above in the open air, but the doctor had I got them arranged for the picture than a German Fokker aeroplane appeared. I scurried out of a window, and the children scurried back into the caves like so many rats. When the Doc had gone the children came up again, and I took the photo."

WOMEN OF CANADA.

Fort Coulonge, Quebec.—"I am happy to tell you that your medicine did me good. I was troubled with weakness and I tried various other things but received very little benefit. I was young at the time and knew very little about medicine. I had a lady friend came to me with a bottle of Dr. Pierce's Favorite Prescription. I became strong and a year afterward had twins."—Mrs. J. Harvey, Fort Coulonge, Quebec.

Thousands of women right here in Canada who are now blessed with robust health cannot understand why thousands of other women continue to worry and suffer when they can obtain for a trifling sum Dr. Pierce's Favorite Prescription, which will surely and quickly banish all pain, distress and misery and restore the womanly health.

Young mothers who preserve the charms of face and figure in spite of an increasing family and the care of growing children are always to be envied. "Favorite Prescription" gives the strength and health upon which happy motherhood depends. It enables the mother to nourish the infant life depending on her, and enjoy the happiness of domestic life, the reward of a perfectly healthy child.

A GREAT BOOK THAT EVERY WOMAN SHOULD HAVE.

Over a million copies of "The People's Common Sense Medical Advice" are now in the hands of the people. It is a book that everyone should have and read in case of accident or sickness.

Send fifty cents (or stamps) for mailing charges to Dr. Pierce's Laxative, Hotel, Buffalo, N. Y., and enclose this notice and you will receive by return mail, all charges and customs duty prepaid, this valuable book.

W. N. U. 1107

Artificial Rain

A New Theory is to be Tested to Produce Rain Artificially

Events indicate that in one respect, at any rate scientific investigators are hopeful of assuming control, to a greater or a lesser extent, of the honored processes of nature. Many attempts have been made from time to time, in the way of artificial production of rain, but thus far without success. A practical test of a newly discovered process, is about to be made in Australia, from which more encouraging results are anticipated. The experiments will be financed by the Government of New South Wales, and will be carried out by J. G. Balsillie, who for four years, has been carrying on researches along specific lines. Experiments in his laboratory has demonstrated that if a room be filled with steam, the discharge of high frequency direct current electricity, together with a simultaneous discharge from a powerful Houton ray gun, causes the whole of the air to be cleared of steam in one and one-half seconds, the floor of the room being consequently covered with large drops of water.

In putting these theories to practical test in the great out-of-doors, a captive balloon, coated with metallic paint, will be used, from which will be discharged electricity into the atmosphere, at a height of from 5,000 to 7,000 feet, and it is hoped that this will cause the formation of a sufficient number of electrified particles to provide nuclei, upon which the moisture of the clouds may condense, in the form of rain. Once the theory has been demonstrated in a single instance, the problem of producing artificial rain by the establishment of a sufficient number of stations, to produce any result that might be desired.

First Traveller—So you have returned from Africa? Had any narrow escapes?

Second T.—Only one—a regular prize-winner, I should think.

First T.—I thought so. Second T.—Well, I was chased by a big lion, and, having no cartridges left, I threw away my rifle and faced the brute, but as he sprang at me I caught him by the lower jaw with one hand and by the nose with the other, and there I stood for half a month, open wide until he starved to death. A narrow escape, eh?

Worst Prison Ever in Germany

Wittenberg, where lie the bones of Luther and Melancthon, was already a place of name in the annals of the Christian faith. To the door of this Schlosskirche Luther nailed his theses on October 31, 1517, thus starting the Reformation. Today it has risen to a new eminence. In that austere literature of silted evidence in regard to the Reformation, today it has risen to a new eminence. In that austere literature of silted evidence in regard to the Reformation, today it has risen to a new eminence. In that austere literature of silted evidence in regard to the Reformation, today it has risen to a new eminence.

The French "75" artillery gun is so steady that a glass of water will not spill when he gun is fired. We know, too, that its effects cause the spilling of something else.

If All Played Out, Try This Prescription

When that overpowering weariness and a never-rested feeling comes over you, it shows some serious disorder is undermining your health. The cure is simple. Build up the system and nourish the body back to health by pure wholesome food.

The one sure means of doing this is with Dr. Hamilton's Pills. They are a marvelous aid to appetite—convert all you eat into nutriment and thus build up the system. This weak body is supplied with new nerve fibers, hardy muscle and firm flesh. Lasting good health is sure to follow. If you really want to get well and stay well, use Dr. Hamilton's Pills, 25c per box at all dealers.

First Editor—Here's one of the most learned men in the country—Professor Skimmington—just passed away. What shall I say about him?

Second Editor—You might refer to him as a finished scholar.

No child should be allowed to suffer an hour from worms when prompt relief can be got in a shape that strong mothers—Mother Graves' Worm Exterminator.

There is hope for the conscientious objector, Colonel Sir William Dunn in a recent speech, said that Mr. Lloyd-George was of opinion that they might be employed in repairing barbed wire at the front!

CHILDHOOD AILMENTS

The ailments of childhood are many but most of them are caused by some derangement of the stomach and bowels. Therefore to banish these troubles the stomach must be kept sound and the bowels regular. Do this nothing can equal Baby's Own Tablets. Thousands of mothers have proved this. Among them is Mrs. Thomas Holmes, Blissfield, N. B., who writes: "My mother-in-law has used Baby's Own Tablets as we all consider them the very best medicine for childhood ailments." The Tablets are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

"National hatred is a singular thing. You will find it strongest and most violent where there is the lowest degree of culture." Thus spoke the German poet Goethe, but that was some years ago.

"So you were at Jack and Nellie's wedding, were you? How did Jack look during the ceremony?" "He looked awfully solemn. But I suppose that was only natural, seeing that he was ringing his own bell."

The French Air Terror

Naverre, the French Aviator, Has Established a Reputation

Naverre is one of the national names of France, whose wholesome terror to the aviators of Germany. A few weeks ago he brought down three machines of the enemy in the clouds above the sectors occupied by the flms in the Verdun battle area. That made eight in all since he took to flying a few months after the war began.

When he had finished his triple victory at Verdun, he complained of the breakfast that was given him, cursing his fate that he had not wrought havoc upon four of the German air craft, and uttered a dissent against having to go to bed. Which simply means that Naverre has a temperance. He can be angry, too, when out of sight in the heavens.

His observer on one occasion told him intensely wroth. When only about a hundred feet away from a German machine he complained of the aeroplane, and missed, Naverre immediately flew home, descended and opened a fire of vituperation upon his unfortunate second. "Give me a chance," said the observer, "and I will re-establish myself in your estimation." Naverre at first was not then generously consented. The chance came in two days after, when flying through space Naverre spotted an aviator. Whirling up into the sky to get a proper height, he "peaked himself" in the flying language. That is, he made a useless charge.

This time the observer's nerve stood the test. He took the fire of the German machine with a quiver. When he was within 30 metres—Naverre's favorite—he opened upon the enemy. Both Germans were wounded and the engine was shot full of holes. Naverre circled about the plane after it landed and patted his observer on the back.

An Oil That is Famous—Though Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia, New Zealand. That is for afool enough to attest its excellence, for in all these countries it is on sale and in demand.

Out in Wisconsin the game warden, in making his rounds, came upon a youthful fisherman. To make sure that the boy was not disobeying the bass-fishing law, the warden took a string of fish out of the water and found only catfish, perch and suckers on the line.

A few feet farther down the stream, however, he found a large black bass wiggling on a string weighted down with a stone. Naturally, the warden made inquiry as to what he was doing with that fish. "I was doing with that fish as I was doing with that fish," explained the lad, "he's been taking my bait all the morning, and so I just tied him up there until I get through fishing."

Me is an Antiseptic

Everything is good in its place. The bile, which, under certain conditions, causes so much distress, is of the greatest value as an antiseptic and cathartic when it is properly handled by the liver.

The chief function of the liver seems to be the filtering of bile from the blood, where it acts as a poison, and pouring it into the intestines, where it hastens the course of the food mass through the alimentary canal, and by its antiseptic influence prevents fermentation of the food.

When you suffer from biliousness and indigestion and have a coated tongue, bitter taste in the mouth, headaches and loss of appetite, you will do well to look to the condition of the liver. Other symptoms are wind on the stomach, which causes belching, and the formation of gas, which gives rise to dizziness and pains about the heart.

Because the liver has failed, the food in the alimentary canal is fermenting instead of being digested, looseness and constipation of the bowels alternate, the whole digestive system is thrown out of order and the blood is poisoned.

By immediately awakening the action of the liver and bowels, Dr. Chase's Kidney-Liver Pills affords relief for this condition most promptly. On this account they are generally recognized as the most effective cure for biliousness, liver complaint, indigestion, constipation, and the pains and aches which arise from poisons in the blood. The benefits are lasting because this medicine removes the cause of trouble.

One pill a dose, 25 cents a box, all dealers, or Edmundson, Bates & Co., Limited, Toronto. Do not be talked into accepting a substitute. Imitations disappoint.

Dr. A. W. Chase's Kidney-Liver Pills

No March on Berlin

Germany has, we believe, shot her bolt on land wherever she may do by piracy in the effort to open the door of the seas. But that does not mean that she is not still a formidable foe. Put upon the defensive her power of resistance will be still little short of her maximum and no one at this stage of the war is likely to cultivate the old dreams of a march on Berlin. The war will not end in that way. It could only end in that way by an unthinkable sacrifice of life. It is much more likely to end when Germany realizes that she is beaten. Already she is realizing that she cannot win.

Tailor how many pockets in your trousers?

"In this war with Germany what do you propose doing?" "The Government, if I could get a big supply contract."

Pat was very fond of strong tea. He always prised a housekeeper according to the strength of the tea she made. Recently the woman of the house where Pat worked was pouring out the tea for his breakfast. It was coming out very slowly and the good woman asked Pat to excuse the tea-pot, as it had a bad spot. Pat (not liking the look of the tea) said sadly: "Oh, begorrah, ma'am, don't blame the teapot, because anything weak must go silly."

He serves a bad master who serves the multitude.—E.C.

SYNOPSIS OF CANADIAN NORTH- WEST LAND REGULATIONS

THE sole head of a family, or any male over 18
years old, may homestead a quarter section
of available Dominion land in Manitoba,
Saskatchewan or Alberta. Applicant must appear
in person at the Dominion Lands Agency or
Sub-Agency for the District. Entry by proxy may
be made at any Dominion Land Agency (not sub-
Agency), on certain conditions.

Duties—Six months' residence upon and cultiva-
tion of the land in each of three years. A home-
steader may live within nine miles of his homestead
on a farm of at least 80 acres, on certain conditions.
A habitable house is required, except where resi-
dence is performed in the vicinity.

In certain districts a homesteader in good standing
may pre-empt a quarter-section alongside his home-
stead. Price \$2.00 per acre.

Duties—Six months residence in each of six years
after earning homestead patent; also 20 acres extra
cultivation. Pre-emption patent may be obtained as
soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead
right may take a purchased homestead in certain
districts. Price \$200 per acre. Duties—Must reside
six months in each of three years, cultivate 20 acres
and erect a house worth \$200.00.

The area of cultivation is subject to reduction in
case of rough, scrubby or stony land. Live stock
may be substituted for cultivation under certain con-
ditions.

picnic committees will be held on
the grounds at 2 p.m. sharp, on
Saturday, June 24th.

Weather Man on the Rampage

The weather man has been
rather liberal with the elements
in this district lately, doing dam-
age to a windmill and lots of hay
racks.

Couldn't Do Without the Ladies, Bless 'em!

A meeting of the Women's In-
stitute was held at the home of
Mrs. L. D. Butts, on Tuesday,
May 13th. The quilts worked by
the ladies of the Institute for the
Red Cross were raffled off, the
lucky numbers being drawn by a
Toronto lady and Mr. Lenn
Iddings, formerly of this district.

Yes, But Who Bunched the Sugar

A very enjoyable evening was
spent in the schoolhouse last
Friday night, when Mr. Austin,
newly appointed minister, was
the guest of his congregation.
The evening was spent in songs
and recitations by both the chil-
dren and grown-ups. The feature
of the evening was a dialogue by
five of the school girls. After
our chairman had found the sugar
everyone enjoyed a sumptuous
repast provided by the ladies.

Impoundment Notice

Notice is hereby given, under sect.
210 of Rural Municipalities Act, that
1 Black and White Steer, branded
V on right shoulder and YF on
right hip
1 Red Steer, white face, long horns, 2
years old, branded
V on left shoulder and YF on
left hip
was impounded in the pound kept by
the undersigned on n.e. sec. 16-28-6 w 4,
on the 5th day of June, 1916.
O. H. Bergh, Poundkeeper

Notice of Impoundment

The Rural Municipality of
Collingwood, No. 243
NOTICE is hereby given that under
section 211 of the Rural Municipality
Act, and of By-Law No. 5 of the R.
M. of Collingwood, No. 243
One Bay Mare, blind in one eye,
weight about 1200 lbs, brand 3H on
left shoulder
One Roan Mare, weight about 1200
Brands X A on left hip
on left shoulder

was impounded in the pound kept by
the undersigned on the n.w. qr. sec.
22-26-8 w 4th m, on the 24th day of
May, 1916.

A. Stevenson,
Pound Keeper

Heathdale, P.O.

Notice of Impoundment

Notice is hereby given that
One Roan Steer, with long,
droopy horns,
One Black Steer (mully) brand
not distinguishable
both branded V on left shoulder
was impounded by the undersigned
on Monday, May 29th, 1916, in pound
in 23-27-8-4, Collingwood
D. H. LUCAS, Poundkeeper

What Occupation Of Verdun Means

American Writer Gives Reasons Why Verdun Was Chosen as German Objective

Why did the Germans choose Verdun as their objective? The minds of most casual readers of history and of war news, Verdun is accepted as the bulwark of the French west gate. Paris, and the chief fortress of that great barrier which from Luxembourg to Switzerland defended the eastern frontier of the Republic. It was, all things considered, the strongest fortified place in Europe when the war came. Why, then, did the Germans elect to fight here?

The reason is simple. The first months of the war utterly eliminated fortresses from the reckoning. The rapid collapse of Liege, Antwerp and Maubeuge demonstrated that the fort had failed to perform its duty. What was illustrated in the west in the early days was finally demonstrated in the east later on. The Russian fortresses followed the path of the Belgian and French. Accordingly the French after the Marne simply abandoned the forts. They took up defensive positions. They took the guns out of them; they moved them to new, concealed positions and the forts ceased to have real importance. Verdun was only a point in the long trench line running from the North Sea to Switzerland. The forts, after that they provided protection for reserves, lost all value from the reckoning. Into the system of trenches, and Verdun was defended by men and by guns and by ditches, precisely like Rheims or Arras.

In the second place, Verdun was the most difficult place in the French line to supply either with men or munitions. Before the war two railroad lines of first importance met at Verdun—one, a double-track line coming east from Paris in the direction of Metz; the other coming north along the Meuse valley from the Paris-Nancy line. When the Germans cut the latter line in September, 1914, they cut the latter line. In the retreat from the Marne, the Germans cut the Verdun line at Varennes and Montfaucon, and from those towns their heavy artillery commanded the Paris-Verdun line by indirect fire and it ceased to be available.

There was left to the French, then, only one narrow road, the road north from Bar-le-Duc, a light rail, incapable of bearing heavy traffic because of the grades. Practically, then, Verdun was isolated. The railroad communication was concerned, and the army defending the Verdun sector was isolated almost entirely upon road transport, upon automobile trucks, or as the French say, camions. This transportation system as long as Verdun was held, by a relatively small force and was only a fraction of the great front, but would be sufficient to hold it. The road was directed at this sector and the Germans massed two thousand guns and a quarter of a million men in the narrow front? Could France maintain or supply an equal number of men and guns in the front? The answer is obvious. The Germans believed not.—Frank H. Simonds, in the American Review of Reviews.

An Opportunity for The Poultry Raiser

The Present Outlook Warrants Greatly Increased Production in 1916

From present indications Great Britain will require all the eggs and poultry Canada can produce in 1916. Last year, as a result of greatly increased production, Canada was able to ship to Great Britain the largest quantity of eggs exported since 1902, and at the same time reduced her need for home consumption by nearly a million dozen.

Canadian eggs have found favor on the British market, and the prospects are that, by increasing the production of this year, the unusually high prices prevailing in the present year are largely due to this anticipated export demand.

Prices for poultry are also high, and will likely continue to be the rest of the season. Last fall and winter all the surplus Canadian poultry was exported at highly profitable prices. Between fifty and sixty cars of live poultry were shipped from Western Ontario to the Eastern States alone, and in the Maritime Provinces, the poultry in Prince Edward Island, the export demand for canned poultry has recently enhanced prices for producers.

Although some uneasiness has existed on the part of the trade as regards transportation facilities in view of the high freight rates and the shortage of boats, it is now reasonably certain that an even greater demand for Canadian poultry and eggs will occur this year. It is important, therefore, that every poultry producer takes steps to protect himself, by hatching as many chickens as possible this spring.

Now is the time, by hatching early, by hatching everything possible in the month of May, to guard against the marketing of so much small, immature, poorly finished poultry, which annually becomes a drag on the market in the fall of the year. Again it is important to hatch early, and give the chickens every possible chance to thrive and grow, that a maximum supply of eggs can be obtained in the winter time.

Given their proportionate amount of attention, the poultry raiser can bring quick and profitable returns to the farmer. With the increasing cost of meats, milk, butter, etc., there is a constantly increasing demand for poultry and eggs. The labor problem is not critical, as the boys and girls on the farm can readily be trained in the poultry. The cost of feed is nominal, prices for poultry and eggs are high—the highest in many years. It is obvious, therefore, that Canadians have a patriotic as well as an economic duty to perform in making the year 1916 the best year for poultry production in Canada.

Germany Feeling Pinch

British Blockade Likely to Be Decisive Factor of the War

The London Daily Chronicle says: "All the news from Germany indicates that the British blockade is likely to prove a decisive factor. The masses of the population are half-starved, particularly in the towns. Middle classes and rich are suffering greatly."

"Continuation of this state of affairs will lead to the collapse of the German press, despite the censorship, but neutral diplomats in Germany and neutral visitors to that country all bring back the same story of an unloved population, stagnant industry, universal war-weariness and desperate yearning for peace."

"Diplomats in Berlin have begged to be allowed to import their own food. Some of them have got milk, for their children especially, from Denmark and Holland."

"German women are taking their children to Holland to get enough milk for them."

"Other signs that the country is in extremis are: Recent failure of the Berlin bread rationing; the advance in the price of potatoes, although the French are growing them; the price of beef, veal and mutton; the price of the various sorts of oil, and the price of the various sorts of oil and fat."

A Parallel
About the only parallel in British history is: Recent failure of the London bread rationing; the advance in the price of potatoes, although the French are growing them; the price of beef, veal and mutton; the price of the various sorts of oil, and the price of the various sorts of oil and fat."

History tells us that Gordon might have escaped by flight after the desertion of the city, but he refused to do so, trusting to the chivalry and honor of his foe with what fatal result to himself is well known. That was more than thirty years ago.

Again a British general has surrendered to a Mohammedan leader, but this time under different auspices. Whatever their record in the past, the Turks have in this war at least treated their opponents with far more consideration and chivalry than the Germans have. Infidels they may be, but they have shown their Arabian allies that they can honor and respect a brave foe, which is more than can be said of the former.

There is no doubt, therefore, that General Townsend and his gallant men will be treated in a manner that will do justice to their brave fight against overwhelming numbers.—Calgary Herald.

Almost Choked

A lady was continually accusing her husband of extravagance without any real cause. The girl bore this accusation patiently for a time, but at last she rebelled. She informed his mistress that the coal had been consumed. The lady blurted out:— "What! Done already? Why, you surely ate them!" Next day the candles were all done. "Candles done!" said the mistress. "Why, I bought half a pound only a week ago. Where have they all gone?" "Well," replied the servant, sarcastically, "I'll tell you where the candles went to go: rate them to grease my throat so that I could swallow the coal more easily!"

Air tight cases have been patented for protecting tennis racquets and balls from dampness.

Need For Home Production

Statistics recently published reveal a regrettable situation regarding trade relationship between British Columbia and the United States. During the month of March there was shipped to British Columbia from the United States through the port of Seattle, produce valued at over \$2,000,000, while the American city received only about \$600,000 worth of goods from British Columbia. Of the material exported from Canada a very large part is made up of copper for refining, paper and coal, while the Canadian (services receive heavy shipments of agricultural produce, which it might grow itself with equal facility. Apples, beans, butter, cheese, eggs, dried fruit, meat, wheat and vegetables are among the articles which that province should be able to export and not have to import.

That something is radically wrong in the export production or the marketing of agricultural produce in the western province is evident. It is with the object of improving these conditions that the Dominion Food Products Committee, inaugurated by the Victoria Board of Trade, is working.

Mr. A. D. Peterson, president of the B. C. Stockbreeders' Association, speaking at Victoria said: "During the war, it is the duty of those who remain at home to do everything in the fields, flocks and herds. By so doing, those of us who must remain at home can serve our country just as loyally as by serving in the trenches. Even suppose this might entail loss, we should be willing to sacrifice some of our profit here, and to go to the front and sacrificing their lives for the Empire."

The last year has been marked by an increasing interest in mixed farming in British Columbia. This is particularly true of some districts that previously had been regarded as almost exclusive fruit lands. Creameries have been built at Grand Forks, Kelowna and Salmon Arm, and all are reporting satisfactory results. In the district of Kelowna, fourteen silos were built during 1915.

Along the line of the Grand Trunk Pacific, much live stock is being introduced, and the foundation is being laid for more or less mixed farming communities. In many of the newer localities advantage has been taken of the Dominion and Provincial schemes for supplying pure-bred stock. This stimulates an interest for more, as well as better live stock.

The sheep industry has been particularly favored during the year last past. Mutton and wool have commanded excellent prices, while the outlook for the immediate future is promising. From all parts of the Province there are inquiries for breeding stock, and it is only the scarcity of such an enemy that has prevented rapid development. In many districts owners of sheep have suffered considerable losses from the loss of panthers, coyotes, and especially dogs, and it might be well for this convention to make the place of the dog, asking the Government to pass a law requiring that all dogs be licensed, and that the license fee be made such as would be of great use. Owing to the high prices for grain which prevailed a year ago, the hog industry suffered a setback. It is probable that the situation will last until the war is over, or so an immediate removal of the industry can hardly be expected. But even under present conditions the hog can be raised quite profitably by those who can provide suitable pasture to supplement the grain ration.

While it is true that certain sections of country are particularly suited to the production of one particular crop, it is equally true that carried on even in these communities supply lines are not entirely reliable. British Columbia should be one of the last provinces in the Dominion to be content with mixed farming. It is to be hoped that the province will soon be able to supply not only her own local needs, but will become an exporter of the kind of produce which now come to her own markets through the port of Seattle.

Continue Splendid Co-operation

The ideal of co-operation, would be for the allies to adopt the policy of free trade among great trusts, not for private leisure. That would mark the greatest advance ever made in world relations, and would be the noblest fruit of the war. We hope that heroic exploit will be discussed at the conference. But in the absence of such an achievement, there are many things to be done. The allies at the present time are not doing enough in an unprecedented measure. We are working together as one firm, producing, England on the one side, on the other—let us arrange, all for the common benefit. We have no great trusts, not for private advantage, but for the general advantage, and have excluded the exploitation of the middleman from the areas of trade. Let us organize the continuance of this splendid co-operation, and let us let the world know that we are in peace.—London Daily News.

A Change in Tune

Though we can expect to carry this war to a successful issue for our country only by making these sacrifices, the unanimity and enthusiasm that we have shown, nevertheless we cannot help feeling that the pain of it when we look that millions of valuable German lives must be sacrificed to a barbarous war of annihilation, which could have been avoided, had adequate reason, right politics and wise diplomacy prevailed on our side, and that the appreciation of Germany's demands prevailed on the side of our opponents.—Professor Ernest Haekel.

Long in the Making

The Prussia of today, with its cursed rule and cursed principles, has been long in the making, and what an unhappy, ugly mass it is! It has been described as the last remaining bulk of materialistic barbarism. The wonder is that when we ship at the shrine of mere force, students from our country and other countries, that they should be so blind to what was going on around them. Winnipeg Tribune.

The Way to Tell

"Mike," said Pat, "how do you tell the age of a fowl?"
"No, it can always tell by the teeth," said Mike.
"By the teeth?" exclaimed Pat.
"But a fowl isn't got no teeth," said Mike.
"No," said Mike, "but it has a beak."

Earning Their Honors

The Austrians are decorating Uboat commanders. The murders committed by these brave fellows are undermining the Hohenzollern throne. Viewed from another way, they deserve all the honor that can be heaped upon them.—Brooklyn Eagle.

Shortage of Heavy Horses

Canadian Market Drained by Demand For Heavy Animals For War Service

"There is a great shortage of heavy horses in Canada, the Canadian market having been drained as a result of the heavy demand for horses of the heavy type for war service. Over 60,000 horses have been taken out of the Dominion since the war started. It is now up to the Canadian breeders to get busy. They must, if a normal standard is to be maintained after the war is over."

This statement was made by John Bright, Dominion Livestock commissioner, at the annual meeting of the Canadian Livestock Breeders' Association held in Toronto recently. Mr. Bright stated that in order to cope with the horse situation in the western provinces, in which a large supply of horses had been drafted for service, the Dominion government had been purchased by western farmers in eastern Canada.

The livestock commissioner also strongly advised the farmers to pay particular attention to the breeding of heavy horses, especially the breeding of stallions in which there had been a marked falling off last year. In this connection, he pointed out that the Canadian Livestock Breeders' Association had been formed to save the situation and thus prevent a scarcity of heavy horses which are always in demand.

Bright also called the attention of the breeders to the fact that the cattle, hogs and sheep situation was very serious. It was stated that since Jan. 1, last over 367,000 hogs had been imported from the United States, and that there was evidence that there should be a renewed interest and energy in this hog breeding industry in Canada. He also elaborated upon the importance of beef cattle and sheep from the United States and emphasized the fact that the Canadian prices for these animals should be such as to induce breeders to improve the situation in order to supply the requirements of the Canadian market.

An Aviation School

The naval department announces that it is planning to establish a limited number of trained aviators from Canada for commissions in the Royal Naval Air Service. It will be a view of providing training for the Curtiss Aviation School, which is required in Toronto. Canadian aviators will be sent to the service as requested to apply to the secretary of the Department of Naval Service at Ottawa. The number of candidates are from 18 to 25 years and only well educated, athletic and thoroughly fit men. The entrance examination will be held in the month of June. A gratuity of one hundred dollars will be paid to those obtaining a pilot's certificate from the Canadian aviation school. On condition that the aviator joins the Royal Naval Air Service and undertakes after the war to serve in the Canadian flying corps should one be organized in Canada.

Absolutely Fearless

Elder to Beattie—"Well, John, how do you like the stranger minister?"
"He's a fine fellow, but he's an awful frightened kind of a chap. You'd notice how he eye talk about our adversary, Satan? Or our own devil? He's a real coward. He doesn't care a darn for him."

Persia's First Railroad, Running from the Russian frontier to Tabriz, was opened in March.

observations can be taken and missiles released.

A large vertical rudder and horizontal elevating planes furnish ample means of controlling the ship. Hydrogen gas will be used to give ascensional power, and while the speed cannot be accelerated until after the use, it is estimated that it would not be far from fifty miles an hour. Enough fuel will be carried for a six-hour trip under full load.

"I believe that the D-10 will answer the requirements of our development," an officer said. "If it will, such modifications as are necessary will be made. There is no reason why we cannot build just as good dirigibles here as can be had in Europe."

A number of others are working on plans for the airships, and there is no question but that a suitable type will be evolved in the United States. After we have made one or two at Washington I shall be prepared to say just what the machine will do.

"Subjecting the model to various pressures in the wind tunnel at the laboratory will determine exactly what the wind resistance will be on the full size machine."

The most difficult problem to solve is that of obtaining the right kind of fabric. Heretofore most of this material has been imported from France. But domestic manufacturers have been experimenting, and the samples submitted by five concerns have convinced me that a suitable grade of rubberized cloth can be manufactured here. The amount necessary is 1,400 yards for each machine."

WILSON'S IDEA OF A HERO.

Here is President Wilson's idea of a hero, expressed in a letter from him to Secretary Lane.

"The recuser of the bureau of mines who braves the poisonous gases and saves a mine from death, the coast guard who at the peril of his own life saves passengers of a helpless vessel from death, the hero of the public health service who stops a dreaded scourge in its incipency, the engineer who succeeds in reducing the hazards of industry to its men and the man who brings about better conditions of labor, these are the heroes of the new era who will be best regarded in the future."

His House Was Stolen.

Pete Petrony of Indiana Harbor, Ind., rented his little cottage to his friend and neighbor, John Egan, who had just come to Chicago. When he came back a month later he was unable to find his house and he was told that it had been sold. The police say the house has been stolen.

Valuable Clay Deposits Opened

C.N.R. Building a Spur Line in Quebec That Will Open up Extensive Kaolin Beds

The outlying of German and Austrian porcelain wares from the Canadian market has been in favor of "Made in Canada" products has been brought appreciably closer by the construction of a spur line, by the Canadian Northern Railway from its Montreal branch, to an extensive deposit of kaolin near Huberdeau, in Quebec. It is from similar deposits of that nature, resources that manufacturers in the Teutonic empires have produced the supplies of china-ware that have been marketed to homes in all parts of the world, and the prevalence of the "Made in Germany" inscription on the underside of cups, saucers, and plates in the average home in Canada alone, furnishes an indication of the widespread character and value of the business.

But it is not in the manufacture of table ware alone that Kaolin is important. In fact, it is one of the most important in the production of the finer grades of printing paper, and in the making of insulators for high power electric transmission lines. Austrian makers had developed an international trade of considerable magnitude in the manufacture of glass, and the introduction of the Kaolin deposit into the business of making these essential, and largely because of the Kaolin deposit, the industry seems to have made remarkable progress. The Kaolin deposit, which has been already put into touch with Canadian users. This Quebec supply includes the glass industry too, for the by-product is a pure silica, which is suitable for the manufacture of glass and sandpaper, and is utilized as moulding sand and for other purposes.

Kaolin is supposed to be decomposed felspar, and occurs in pockets or fissures of various sizes, and ranges from a faint yellow to pure white, the latter being the more valuable. The deposit is also a factor. The deposit rendered accessible by the Canadian Northern is supposed to be many thousands of feet in depth, and is pure white in shade, and expected to furnish a vast quantity of grades of porcelain and pottery may be manufactured, and of course, insulators as well. Success in the burning of the Kaolin deposit is a product of a high grade, depends greatly upon the character of the material. The deposit is a pure white, and is pure white in shade, and expected to furnish a vast quantity of grades of porcelain and pottery may be manufactured, and of course, insulators as well. Success in the burning of the Kaolin deposit is a product of a high grade, depends greatly upon the character of the material.

The Canadians who are interested in this development have received from the Hon. Mr. Pollitt, agent general for the Kaolin deposit, a report made for him by Dr. Bigot of Paris, on the Kaolin deposit, which is a Canadian flying corps should one be organized in Canada.

The Kaolin deposit is a Canadian flying corps should one be organized in Canada. The Kaolin deposit is a Canadian flying corps should one be organized in Canada. The Kaolin deposit is a Canadian flying corps should one be organized in Canada.

Aftermath

OF A NOTED CASE AT THE TIME

There was an unusual development in the Johnston attempted murder case, the principals of which live or lived at Oyen, in the supreme court last week. This was when a consent judgment for \$1,000 was filed against the estate of Fred Johnston, who is at present serving a life sentence in Edmonton penitentiary for the attempted murder of his nieces, Alexia and Ella Johnson. It will be recalled that following an altercation between the members of the two families, Fred Johnston fired three bullets through the walls of his brother's house. All three bullets took effect, wounding Ella J. and John W. Johnston slightly and inflicting such injuries upon Alexia that she died.

While the accused man was awaiting trial a writ was filed against him by his brother acting on behalf of the latter's children, asking damages for some \$5,000. The case was recently heard and arrangements were later reached whereby the amount of the judgment was fixed at \$1,000.

The small boy is always anxious for a victory, but you seldom see him ambitious to beat a carpet.

Chinook Consolidated School District, No. 16

PUBLIC NOTICE is hereby given that the Board of Trustees of Chinook Consolidated School District No. 16, of the Province of Alberta, at a meeting on Saturday evening, May 27th, 1916, passed a By-Law to borrow by debentures a sum of money not exceeding Fifteen Thousand Dollars, for the purpose of erecting and equipping a School for the above district and for purchasing conveyances for same, said debentures to bear interest at a rate not exceeding seven per cent. per annum and to run for a period of twenty years.

Unless within fifteen days from the date of this notice, a demand in writing, signed by at least twenty ratepayers of the said district, demanding a vote of the ratepayers for and against the said By-Law, is received by the Secretary or the Chairman of the said district, the Board of Trustees will proceed to apply to the Minister of Education for authority to borrow the said amount, and on the conditions as aforesaid.

I W. DEMAN, Chairman
 LORNE PROUDFOOT, Sec.-Treas.

Dated at Chinook, this 31st day of May, 1916.

School and Equipment for Sale

I HAVE been instructed by the Board of Trustees of Popular S. D., No. 2613, to offer for sale the following property of the said district:
 The School Building, which is large and well-built—has a neat cold-shed behind—would be a good investment for a neighboring district requiring a school or a church; or with but little extra cost it could be made into a fine dwelling.

A Stable, large enough for 8 or 10 horses.

Two good Closets, with screened approaches.

Fencing, 7 or 8 stout cement posts, large and small iron gates, cedar posts, and woven wire enough to fence 2 acres, some of the wire never been unrolled.

Teachers' desk, office chair, 2 other chairs, about 15 desks for pupils, large map case and maps, library case and library, reading tablets, large bell, blackboard, etc.

Waterbury Heating System, good as new.

A Good School Organ, in use but a short time.

Two screen doors—never been used; coal and kindling.

Everything must be sold. Tenders will be received for all or for any part of this property. If tendering for more than one part of it, state how much you will pay for each part. This way all will have a fair chance.

Tenders must be in before June 30th. The highest nor any tender not necessarily accepted.
 LORNE PROUDFOOT, Secretary,
 Chinook, Alta.

Notice to Creditors

In the Surrogate Court of the Judicial District of Wynyard

In the Estate of Robert Thomson, late of Guernsey, in the Province of Saskatchewan, Merchant, deceased.

PURSUANT to the Surrogate Courts Act, being Chapter 34 of the Revised Statutes of Saskatchewan and Amending Acts.

NOTICE IS HEREBY GIVEN that all persons having claims against the estate of Robert Thomson, late of Guernsey, in the Province of Saskatchewan, who died on or about the 18th day of March, A.D., 1916, are, on or before the

28th day of June, A.D. 1916

required to deliver or send by post prepaid to the Standard Trusts Company, Saskatoon, Saskatchewan, Administrator of the said estate, full particulars of their claims, duly verified by Statutory Declaration, together with a statement of securities if any, held by them.

AND TAKE NOTICE that after the said mentioned date the Administrator will proceed to distribute the assets of the Estate amongst the parties entitled thereto, having regard only to the claims of which it shall then have notice, and the said Administrator will not be liable for the said assets or any part thereof to any person or persons of whose claim it shall not have had notice at the time of such distribution.

Dated at Saskatoon, Saskatchewan, this 25th day of May, A.D. 1916.

The Standard Trusts Company, Administrator of the said Estate
